Women Do Genre in Film and Television Aug 25 2019 This volume examines how different generations of women work within the genericity of audio-visual storytelling not necessarily to 'undo' or 'subvert' popular formats, but also to draw on their generative force. Recent examples of filmmakers and creative practitioners within and outside Hollywood as well as women working in non-directing authorial roles remind us that women are in various ways authoring commercially and culturally impactful texts across a range of genres. Put simply, this volume asks: what do women who are creatively engaged with audio-visual industries do with genre and what does genre do with them? The contributors to the collection respond to this question from diverse perspectives and with different answers, spanning issues of direction, screenwriting, performance and audience address/reception.

How To Watch Television Feb 09 2021 Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. *How to Watch Television* brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, *How to Watch Television* is designed to engender classroom discussion among television critics of all backgrounds.

The "People Power" Job Superbook Book 10: Media-Journalism Career (Journalism Jobs-Schools, Worldwide Media Guide) Apr 01 2020 In general, communications is considered a glamor industry because of the creativity involved so competition is fierce, even for people with advanced degrees. I've known several people with journalism degrees who couldn't find a job so they ended up as high school teachers or something like that. It's all about your ability with words. Newscasts have to be written everyday. They have to have fresh, new, exciting, crisp stories. It takes a certain pragmatic skill to write good news copy quickly. If you can get a story, summarize it down into your own words very quickly, edit news footage to go with it to create a quick story on the nightly newscast, you will easily be in demand because these skills are rather rare. People who do these jobs often get tired of the stress involved and quit. On the other hand, I heard of one talk show host who had two jobs in different cities. He did his morning talk show, took a plane to the other city 150 miles away, did his evening show

Current up to season 6, the book examined Buffy's development, and outlined the mythical, religious, and historical backgrounds to the episodes. Nikki's guide to season 7 appeared in her *Angel* book, but there was never one place where fans could get their
