*Knowledge, Information and Creativity Support Systems: Recent Trends, Advances and Solutions* Sep 30 2022 This volume contains some carefully selected papers presented at the 8th International Conference on Knowledge, Information and Creativity Support Systems KICCS'2013, which was held in Kraków and Wieliczka, Poland in November 2013. In most cases the papers are extended versions with newer results added, representing virtually all topics covered by the conference. The KICCS'2013 focus theme, "Looking into the Future of Creativity and Decision Support Systems", clearly indicates that the growing complexity calls for some deeper and insightful discussions about the future but, obviously, complemented with an exposition of modern present developments that have proven their power and usefulness. Following this theme, the list of topics presented in this volume include some future-oriented fields of research, such as anticipatory networks and systems, foresight support systems, relevant newly-emerging applications, exemplified by autonomous creative systems. Special attention was also given to cognitive and collaborative aspects of creativity.

**Flip-Flops and Microwaved Fish** Oct 27 2019 A TWENTY-SOMETHING'S GUIDE TO WORKPLACE CULTURE AND COMMUNICATION ?Flip-Flops and Microwaved Fish helps soon-to-be-college grads and those first starting out in their careers learn how to be more than just professional-ish. It offers very funny and practical advice on truly understanding and managing life at work. Written for both American and non-American young workers, in addition to anyone else who's uncertain about how they come across at work, this book provides useful tips that can be immediately implemented to help people adapt well to their workplace culture. In a light-hearted and conversational way, Peter Yawitz, a 30-year veteran in global communications consulting, walks readers through not only formal and written rules of office communication but also unwritten cultural norms in American companies both in the US and abroad. As "Someone Else's Dad," who offers practical advice to a new generation of workers without the nagging and judgment they might receive from their own fathers, the author gives straight talk on everything from mastering small talk, writing persuasive emails, and dealing with sneaky coworkers to managing distracted bosses and asking for a raise. Readers will find an advocate in Yawitz, someone who can help them succeed both professionally and socially at work. They'll laugh out loud at the same time that they'll develop the insights needed to advance in their careers.

Legislative Efforts to Combat Spam May 27 2022

*Snort Cookbook* Sep 18 2021 If you are a network administrator, you're under a lot of pressure to ensure that mission-critical systems are completely safe from malicious code, buffer overflows, stealth port scans, SMB probes, OS fingerprinting attempts, CGI attacks, and other network intruders. Designing a reliable way to detect intruders before they get in is an essential--but often overwhelming--challenge. Snort, the defacto open source standard of intrusion detection tools, is capable of performing real-time traffic analysis and packet logging on IP network. It can perform protocol analysis, content searching, and matching. Snort can save countless headaches; the new Snort Cookbook will save countless hours of sifting through dubious online advice or wordy tutorials in order to leverage the full power of SNORT.Each recipe in the popular and practical problem-solution-discussion O'Reilly cookbook format contains a clear and thorough description of the problem, a concise but complete discussion of a solution, and real-world examples that illustrate that solution. The Snort Cookbook covers important issues that sys admins and security pros will us everyday, such as: installation optimization logging alerting rules and signatures detecting viruses countermeasures detecting common attacks administration honeypots log analysis But the Snort Cookbook offers far more than quick cut-and-paste solutions to frustrating security issues. Those who learn best in the trenches--and don't have the hours to spare to pore over tutorials or troll online for best-practice snippets of advice--will find that the solutions offered in this ultimate Snort sourcebook not only solve immediate problems quickly, but also showcase the best tips and tricks they need to master be security gurus--and still have a life.

PHP Cookbook Jun 15 2021 Want to understand a certain PHP programming technique? Or learn how to accomplish a particular task? This cookbook is the first place to look. With more than 350 code-rich recipes revised for PHP 5.4 and 5.5, this third edition provides updated solutions for generating dynamic web content—everything from using basic data types to querying databases, and from calling RESTful APIs to testing and securing your site. Each recipe includes code solutions that you can freely use, along with a discussion of how and why they work. Whether you're an experienced PHP programmer or coming to PHP from another language, this book is an ideal on-the-job resource. You'll find recipes to help you with: Basic data types: strings, numbers, arrays, and dates and times Program building blocks: variables, functions, classes, and objects Web programming: cookies, forms, sessions, and authentication Database access using PDO, SQLite, and other extensions RESTful API clients and servers, including HTTP, XML, and OAuth Key concepts: email, regular expressions, and graphics creation Designing robust applications: security and encryption, error handling, debugging and testing, and performance tuning Files, directories, and PHP's Command Line Interface Libraries and package managers such as Composer and PECL

**Internet-Based Organizational Memory and Knowledge Management** Nov 01 2022 The Internet is quickly moving from a marketing tool in which businesses and organizations promote sales and awareness, to a core element of any information system architecture. The advent of the Internet as a fundamental infrastructure for the delivery of advanced business systems has opened up a wide range of questions for the design and development of such systems.Internet-Based Organizational Memory and Knowledge Management provides a multidisciplinary view of the wide range of ideas on innovative Internet information systems as they related to organizational memory and knowledge. Using the Internet as the primary architectural base, this book presents results and challenges of Internet-based knowledge management systems.

**Google Apps Deciphered** Jul 05 2020 This is the eBook version of the printed book. If the print book includes a CD-ROM, this content is not included within the eBook version. Google Apps Deciphered Compute in the Cloud to Streamline Your Desktop Use Google Apps to Improve Productivity and Collaboration, Reduce Costs, and Eliminate Technology Hassles! Google Apps gives you virtually all the business and productivity software you need—all of it free, or available at extremely low cost. Because the suite of Google Apps runs on Google's network in the cloud, you avoid the hassles that go with desktop software. Getting started with Google Apps is easy—but if you want to make the most of it, you'll need expert guidance that Google's online help doesn't provide. Get all the help you need, right here. This is your start-to-finish guide to setting up Google Apps, migrating to it, customizing it, and using it to improve productivity, communications, and collaboration. Scott Granneman introduces every leading component individually, and shows exactly how to make them work together for you on the web or by integrating them with your favorite desktop apps. You'll find practical insights on Google Apps email, calendaring, contacts, wikis, word processing, spreadsheets, presentations, video, and even Google's new web browser Chrome. And, drawing on his extensive experience helping companies move to Google Apps, Granneman presents tips and tricks you simply won't find anywhere else. Coverage includes • Choosing the right edition of Google Apps for you • Setting up Google Apps so it will be easier to use and manage • Migrating your email, contacts, and calendars to Google Apps • Administering and securing Google Apps • Integrating Google Apps with other software and services • Leveraging Google Sites to collaborate across teams, organizations, or the entire world • Making the most of Google Talk voice calls and instant messaging • Implementing Google's office productivity tools, including Docs, Spreadsheets, and Presentations • Using policy management and message recovery to control and secure your messaging • Customizing efficient Google Apps Start Pages for you and your colleagues • Sharing important and useful videos with your colleagues • Maximizing the innovative features of Google's new web browser, Chrome SCOTT GRANNEMAN is an author, teacher, and entrepreneur with extensive experience in Google Apps migration, setup, and training. As Adjunct Professor at Washington University, he teaches popular courses on technology, security, and the Internet. A monthly columnist for SecurityFocus and Linux Magazine, he has authored four books on open source technologies, including The Linux Phrasebook. As a principal at WebSanity, he manages the firm's UNIX server environment, and helps develop its Content Management System, which is used by educational, business, and non-profit clients nationwide. www.1and10zeroes.com

A+ Guide to IT Technical Support (Hardware and Software) Aug 25 2019 This step-by-step, highly visual text provides a comprehensive introduction to managing and maintaining computer hardware and software. Written by best-selling author and educator Jean Andrews, A+ Guide to IT Technical Support, 9th Edition closely integrates the CompTIA+ Exam objectives to prepare you for the 220-901 and 220-902 certification exams. The new Ninth Edition also features extensive updates to reflect current technology, techniques, and industry standards in the dynamic, fast-paced field of PC repair and information technology. Each chapter covers both core concepts and advanced topics, organizing material to facilitate practical application and encourage you to learn by doing. The new edition features more coverage of updated hardware, security, virtualization, new coverage of cloud computing, Linux and Mac OS, and increased emphasis on mobile devices. Supported by a wide range of supplemental resources to enhance learning with Lab Manuals, CourseNotes online labs and the optional MindTap that includes online labs, certification test prep and interactive exercises and activities, this proven text offers students an ideal way to prepare for success as a professional IT support technician and

administrator. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Instructional Story Design** Sep 06 2020 Once Upon a Time, Storytelling Met Instructional Design From children to adults, everybody likes a good story. Stories are memorable, actionable, and emotional. We are constantly making sense of the world by forming stories, and that makes them perfect for instructional design. Instructional Story Design is a practical guide to writing and developing stories for training. It takes what you already know about a story's power to connect with people and offers a clear methodology for the otherwise daunting process of creating a compelling story. Master story designer Rance Greene shares his powerful yet familiar process to discover, design, and deliver instructional stories. He presents the two essential elements that must be present to tell a story for training: relatable characters and strong conflict. These elements create a desire for resolution and grab learners' attention. This book offers advice for unearthing the root of the performance problem, creating action lists for learners, and convincing stakeholders about the effectiveness of stories. Case studies from household companies such as Pizza Hut, Southwest Airlines, and PepsiCo show story design in action. Job aids and resources include an audience profile questionnaire, character description worksheet, storyboard template, and tips for developing stories using graphics, audio, and video. With this book, you'll:

- Sharpen your analysis skills to discover potential training stories.
- Design relatable stories that concretely connect with learning objectives.
- Easily develop captivating stories with tools you already own.
- Plan your next steps to implement your instructional story.

**Human Aspects of IT for the Aged Population. Healthy and Active Aging** Jan 29 2020 This three volume set of LNCS 12207, 12208 and 12209 constitutes the refereed proceedings of the 6th International Conference on Human Aspects of IT for the Aged Population, ITAP 2020, held as part of the 22nd International Conference, HCI International 2020, which took place in Copenhagen, Denmark, in July 2020. The conference was held virtually due to the COVID-19 pandemic. The total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings from a total of 6326 submissions. ITAP 2020 includes a total of 104 regular papers which are organized in topical sections named: Involving Older Adults in HCI Methodology , User Experience and Aging, Aging and Mobile and Wearable Devices, Health and Rehabilitation Technologies, Well-being, Persuasion, Health Education and Cognitive Support, Aging in Place, Cultural and Entertainment Experiences for Older Adults, Aging and Social Media, Technology Acceptance and Societal Impact.

**Parallel Problem Solving from Nature - PPSN IV** Dec 30 2019 This book constitutes the refereed proceedings of the International Conference on Evolutionary Computation held jointly with the 4th Conference on Parallel Problem Solving from Nature, PPSN IV, in Berlin, Germany, in September 1996. The 103 revised papers presented in the volume were carefully selected from more than 160 submissions. The papers are organized in sections on basic concepts of evolutionary computation (EC), theoretical foundations of EC, modifications and extensions of evolutionary algorithms, comparison of methods, other metaphors, and applications of EC in a variety of areas like ML, NNs, engineering, CS, OR, and biology. The book has a comprehensive subject index.

**MYOB Software for Dummies - Australia** Mar 25 2022 Understand the ins and outs of running MYOB AccountRight software MYOB Software For Dummies covers everything you need to know about using MYOB, from setting up your accounting file to analysing sales figures, managing payroll to preparing Business Activity Statements — and everything in between. With in-depth coverage of all major updates to the current MYOB software release, plus extensive guidance on utilising MYOB's cloud-accounting features, this fun and friendly guide will help you become a MYOB master! MYOB is the biggest selling accounting software in Australia, and MYOB Software For Dummies is the leading reference guide available to help you manage your accounts with ease. Written by Veechi Curtis, a well-known industry expert, this new edition has been fully updated to cover all the latest updates and new features. So what are you waiting for? It's time to let the trusted help of For Dummies take your skills to the next level! Walks you through creating sales and recording purchases Explains how you can use bank feeds combined with bank rules to automate data-entry Shows you how to create business reports to track business success Explores the opportunities of working in the cloud and sharing data Flags information specific to the latest MYOB AccountRight upgrades so you can quickly update your knowledge Saves you hours of time (every week!) with helpful hints and shortcuts If you're a small business owner who is new to MYOB — or new to the latest version —MYOB Software For Dummies sets you up for success.

**Novel Algorithms and Techniques in Telecommunications, Automation and Industrial Electronics** Oct 20 2021 Novel Algorithms and Techniques in Telecommunications, Automation and Industrial Electronics includes a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of Industrial Electronics, Technology and Automation, Telecommunications and Networking. Novel Algorithms and Techniques in Telecommunications, Automation and Industrial Electronics includes selected papers from the conference proceedings of the International Conference on Industrial Electronics, Technology and Automation (IETA 2007) and International Conference on Telecommunications and Networking (TeNe 07) which were part of the International Joint Conferences on Computer, Information and Systems Sciences and Engineering (CISSE 2007).

**Java Servlet & JSP Cookbook** Oct 08 2020 With literally hundreds of examples and thousands of lines of code, the Java Servlet and JSP Cookbook yields tips and techniques that any Java web developer who uses JavaServer Pages or servlets will use every day, along with full-fledged solutions to significant web application development problems that developers can insert directly into their own applications. Java Servlet and JSP Cookbook presents real-world problems, and provides concise, practical solutions to each. Finding even one tested code "recipe" that solves a gnarly problem in this comprehensive collection of solutions and best practices will save hours of frustration—easily justifying the cost of this invaluable book. But "Java Servlet and JSP Cookbook" is more than just a wealth of cut-and-paste code. It also offers clear explanations of how and why the code works, warns of potential pitfalls, and directs you to sources of additional information, so you can learn to adapt the problem-solving techniques to similar situations. These recipes include vital topics like the use of Ant to setup a build environment, extensive coverage of the WAR file format and web.xml deployment descriptor, file-uploading, error-handling, cookies, logging, dealing with non-HTML content, multimedia, request filtering, web services, I18N, web services, and a host of other topics that frustrate even the most seasoned developers. For Java web developers of all levels who are eager to put into practice the theory presented in other API-focused books, the solutions presented in this practical book will prove invaluable over and over again. This is a painless way for less experienced developers who prefer to learn by doing to expand their skills and productivity, while accomplishing practical solutions to the pressing problems they face every day. More experienced developers can use these recipes to solve time-consuming problems quickly, freeing up their time for the more creative aspects of their work.

**The Failure to Produce White House E-mails** Nov 28 2019

**E-commerce** Mar 13 2021 The growth of the Internet continues to influence our lives and businesses. Irrespective of their type and size, all firms and organizations are rethinking their strategies and operations. An increasing number of businesses are using e-commerce to gain competitive advantage. However, doing e-commerce is complex and requires understanding a vast array of topics. This book provides coverage of essential topics in E-commerce i.e. technology infrastructure, building blocks of e-commerce, online marketing, online payment systems, online business models, online business environment issues, website usability, e-commerce strategy, mobile commerce, and e-CRM/e-SCM. Compared with available texts on e-commerce, the perspective of this book is global e-commerce. The book is written in simple language, provides up-to-date coverage of material and associated research, and filled with examples to support material presented. This book is useful for undergrad and graduate students, professionals, and anyone looking to gain a solid foundation to continue their learning of dynamic e-commerce environment.

**Visual Basic 2005 Cookbook** May 15 2021 This book will help you solve more than 300 of the most common and not-so-common tasks that working Visual Basic 2005 programmers face every day. If you're a seasoned .NET developer, beginning Visual Basic programmer, or a developer seeking a simple and clear migration path from VB6 to Visual Basic 2005, the Visual Basic 2005 Cookbook delivers a practical collection of problem-solving recipes for a broad range of Visual Basic programming tasks. The concise solutions and examples in the Visual Basic 2005 Cookbook range from simple tasks to the more complex, organized by the types of problems you need to solve. Nearly every recipe contains a complete, documented code sample showing you how to solve the specific problem, as well as a discussion of how the underlying technology works and that outlines alternatives, limitations, and other considerations. As with all O'Reilly Cookbooks, each recipe helps you quickly understand a problem, learn how to solve it, and anticipate potential tradeoffs or ramifications. Useful features of the book include: Over 300 recipes written in the familiar O'Reilly Problem-Solution-Discussion format Hundreds of code snippets, examples, and complete solutions available for download VB6 updates to alert VB6 programmers to code-breaking changes in Visual Basic 2005 Recipes that target Visual Basic 2005 features not included in previous releases Code examples covering everyday data manipulation techniques and language fundamentals Advanced projects focusing on multimedia and mathematical transformations using linear algebraic methods Specialized topics covering files and file systems, printing, and databases In addition, you'll find chapters on cryptography and compression, graphics, and special programming techniques. Whether you're a beginner or an expert, the Visual Basic 2005 Cookbook is sure to save you time, serving up the code you need, when you need it.

**Cognitive Computing Recipes** Jun 03 2020 Solve your AI and machine learning problems using complete and real-world code examples. Using a problem-solution approach, this book makes deep learning and machine learning accessible to everyday developers, by providing a combination of tools such as cognitive services APIs, machine learning platforms, and libraries. Along with an overview of the contemporary technology landscape, Machine Learning and Deep Learning with Cognitive Computing Recipes covers the business case for machine learning and deep learning. Covering topics such as digital assistants, computer vision, text analytics, speech, and robotics process automation this book offers a comprehensive toolkit that you can apply quickly and easily in your own projects. With its focus on Microsoft Cognitive Services offerings, you'll see recipes using multiple different environments including TensorFlow and CNTK to give you a broader perspective of the deep learning ecosystem. What You Will Learn Build production-ready solutions using Microsoft Cognitive Services APIs Apply deep learning using TensorFlow and Microsoft Cognitive Toolkit (CNTK) Solve enterprise problems in natural language processing and computer vision Discover the machine learning development life cycle – from formal problem definition to deployment at scale Who This Book Is For Software engineers and enterprise architects who wish to understand machine learning and deep learning by building applications and solving real-world business problems.

**Blockchain and Applications** Apr 25 2022 This book constitutes the refereed proceedings of the 1st International Congress on Blockchain and Applications 2021, BLOCKCHAIN'21, held in Salamanca, Spain, in October 2021. Among the scientific community, blockchain and artificial intelligence are a promising combination that will transform the production and manufacturing industry, media, finance, insurance, e-government, etc. Nevertheless, there is no consensus with schemes or best practices that would specify how blockchain and artificial intelligence should be used together. The 38 full papers presented were carefully reviewed and selected from over 44 submissions. They contain the latest advances on blockchain and artificial intelligence and on their application domains, exploring innovative ideas, guidelines, theories, models, technologies, and tools and identifying critical issues and challenges that researchers and practitioners must deal with in future research.

**Email Less Talk More** Jan 23 2022 This timely book addresses the excessive and misguided use of email and helps all of us come to a more sensible view of when, where, and why to use it. It also goes beyond email to provide a roadmap for effective workplace communication in general. You and your organization will be able to go further, faster that is, be more productive. Dr. Mark Frohman, President of Frohman Consulting Corporation and author of The Purpose Driven Organization, Mastering Priorities, and Involving

Others in Problem Solving "I have key staff members chained to their desks daily clearing email and complaining that many emails are not required, or at least they did not need to be copied. I know as an organization we need to communicate more effectively. I look forward to passing this book onto my staff and watching the improvements." Terry P. Roche, President of Thomas Engineering Corporation I spent many years trying to better manage email but seemed to be losing ground on productivity. This book showed me the real solution use email for what it s good for, but don t overuse it. It s easy and fun to read and is packed with much more information than typical self-help and business productivity books. I ve become a more effective communicator, improved my work/life balance, and have helped my staff become more productive as well. Don Silvestri, V.P. of Marketing & Public Relations for Open Sports Network & former Director of Marketing for CBS SportsLine Email Less Talk More is the first book to provide solutions to problems created by workplace email overuse. Instead of treating the symptoms of reduced productivity and information overload with email management techniques and email etiquette, this book addresses the actual root cause. Email is a great communication method for many cases but not for all cases. The book teaches people to choose the most effective communication means email, voicemail, meetings, or direct conversation based on the situation. It challenges readers to consider alternate communication methods before hitting COMPOSE or REPLY. It also provides solutions to many other productivity and work/life balance problems triggered by email and PDAs becoming the new preferred communication tools. Using an easy-to-read story format set in office, home, and family vacation settings, it shows how improper workplace communication especially email can adversely impact productivity, relationships, and personal lives. It provides many examples where email appears to be the most efficient communication tool but is actually much less productive for both the sender and recipients. The lessons from the book are summarized in easy-to-use rules that provide the Do s & Don ts of effective communication."

**Autonomic and Trusted Computing** Apr 01 2020 This book constitutes the refereed proceedings of the Third International Conference on Autonomic and Trusted Computing, ATC 2006, held in Wuhan, China in September 2006. The 57 revised full papers presented together with two keynotes were carefully reviewed and selected from 208 submissions. The papers are organized in topical sections.

**Street Fighter Marketing Solutions** Jun 27 2022 For any business owner, franchise operator, or marketing executive who seeks to increase sales while lowering marketing costs, Jeff Slutsky offers a new way of thinking. In this indispensable guide to getting more bang for your buck, the well-known marketing consultant tells business managers to think tactically and locally -- using nontraditional, highly targeted forms of marketing and advertising. The tactics, ideas, approaches, and strategies in Street Fighter Marketing Solutions are geared for the bewildering new challenges that confront business- people in the new hypercompetitive, advertising-polluted environment in which they must seek profits. With pressures from "big box" retailers, internet competition, and a glut of other immediate competitors, businessmen and businesswomen need a war chest of proven ideas and strategies to help them thrive. Additionally, local businesses suffer from advertising price increases despite eroding audiences from the local media, especially newspapers, radio, and TV. This book could be the answer to your current and future marketing problems. You'll learn how to mold and manipulate traditional advertising methods while supplementing or supplanting them with alternative, novel techniques for lower cost and higher reward. National and regional corporations who sell their products and services through a network of local retailers, franchisees, or dealers will also benefit greatly from this book. It will provide them with an easy-to-understand blueprint on how to develop, roll out, and maintain a practical, money-saving, sales-generating Street Fighter Marketing program throughout their organization. In a book full of success stories, Slutsky discusses in a clear, practical, straightforward manner how Street Fighter Marketing techniques can work for you. The first step to growing your market share may well be to spend a few hours in the company of one of the nation's most savvy and engaging business tacticians. For more information and a downloadable video, visit [www.streetfightermarketing.com](http://www.streetfightermarketing.com).

**Information Technology Governance in Public Organizations** Mar 01 2020 This book examines trends and challenges in research on IT governance in public organizations, reporting innovative research and new insights in the theories, models and practices within the area. As we noticed, IT governance plays an important role in generating value from organization's IT investments. However there are different challenges for researchers in studying IT governance in public organizations due to the differences between political, administrative, and practices in these organizations. The first section of the book looks at Management issues, including an introduction to IT governance in public organizations; a systematic review of IT alignment research in public organizations; the role of middle managers in aligning strategy and IT in public service organizations; and an analysis of alignment and governance with regard to IT-related policy decisions. The second section examines Modelling, including a consideration of the challenges faced by public administration; a discussion of a framework for IT governance implementation suitable to improve alignment and communication between stakeholders of IT services; the design and implementation of IT architecture; and the adoption of enterprise architecture in public organizations. Finally, section three presents Case Studies, including IT governance in the context of e-government strategy implementation in the Caribbean; the relationship of IT organizational structure and IT governance performance in the IT department of a public research and education organization in a developing country; the relationship between organizational ambidexterity and IT governance through a study of the Swedish Tax Authorities; and the role of institutional logics in IT project activities and interactions in a large Swedish hospital.

**Java Cookbook** Jun 23 2019 From lambda expressions and JavaFX 8 to new support for network programming and mobile development, Java 8 brings a wealth of changes. This cookbook helps you get up to speed right away with hundreds of hands-on recipes across a broad range of Java topics. You'll learn useful techniques for everything from debugging and data structures to GUI development and functional programming. Each recipe includes self-contained code solutions that you can freely use, along with a discussion of how and why they work. If you are familiar with Java basics, this cookbook will bolster your knowledge of the language in general and Java 8's main APIs in particular. Recipes include: Methods for compiling, running, and debugging Manipulating, comparing, and rearranging text Regular expressions for string- and pattern-matching Handling numbers, dates, and times Structuring data with collections, arrays, and other types Object-oriented and functional programming techniques Directory and filesystem operations Working with graphics, audio, and video GUI development, including JavaFX and handlers Network programming on both client and server Database access, using JPA, Hibernate, and JDBC Processing JSON and XML for data storage Multithreading and concurrency

**Solaris Guide for Windows NT Administrators** Dec 22 2021 The perfect guide for NT administrators learning Solaris--or anyone integrating NT and Solaris. More and more system administrators face the challenge of integrating Solaris with Windows NT--or of migrating from departmental NT servers to enterprise Solaris Operating Environments. For them, this book will be an invaluable resource. A leading Sun engineer who is also a Microsoft Certified Systems Engineer teaches users all they need to know to smoothly coexist with, or transition from Windows NT.

**IT Essentials** Aug 18 2021 IT Essentials: PC Hardware and Software Companion Guide, Fifth Edition IT Essentials: PC Hardware and Software Companion Guide, Fifth Edition, supports the Cisco Networking Academy IT Essentials: PC Hardware and Software version 5 course. The course is designed for Cisco Networking Academy students who want to pursue careers in IT and learn how computers work, how to assemble computers, and how to safely and securely troubleshoot hardware and software issues. As CompTIA Approved Quality Content, the course also helps you prepare for the CompTIA A+ certification exams 220-801 and 220-802. CompTIA A+ 220-801 covers the fundamentals of computer technology, installation and configuration of PCs, laptops, related hardware, and basic networking. CompTIA A+ 220-802 covers the skills required to install and configure PC operating systems and configure common features, such as network connectivity and email for Android and Apple iOS mobile operating systems. Students must pass both exams to earn the CompTIA A+ certification. The features of the Companion Guide are designed to help you study and succeed in this course: -- Chapter objectives—Review core concepts by answering the focus questions listed at the beginning of each chapter. -- Key terms—Refer to the updated lists of networking vocabulary introduced, and turn to the highlighted terms in context. -- Course section numbering—Follow along with the course heading numbers to easily jump online to complete labs, activities, and quizzes referred to within the text. -- Check Your Understanding Questions and Answer Key—Evaluate your readiness with the updated end-of-chapter questions that match the style of questions you see on the online course quizzes. -- Glossary in the back of the book to define Key Terms The lab icon in the Companion Guide indicates when there is a hands-on Lab or Worksheet to do. The Labs and Worksheets are compiled and published in the separate book, IT Essentials: PC Hardware and Software Lab Manual, Fifth Edition. With more than 1300 pages of activities, including Windows 7, Windows Vista, and Windows XP variations covered in the CompTIA A+ exam objectives, practicing and performing these tasks will reinforce the concepts and help you become a successful PC technician.

**Windows Server 2003 Security Cookbook** Feb 09 2021 A handy problem-solver that teaches you how to perform important security tasks in the Windows Server 2003 OS, using very specific recipes. Each recipe features a brief description of the problem, a step-by-step solution, and then a discussion of the technology at work. There is also a detailed explanation of Microsoft's scripting support.

**Depression** May 03 2020 "Readers looking for help for themselves or a friend will find that this slim volume is chock-full of easy-to-implement ideas for those living with depression."—School Library Journal Teens get a great deal of information and guidance on many things from study skills to college admissions to test taking...and the list goes on. But many teens get no direct instruction about how to manage difficult emotions. This lack of direction can be hard because teens are at an age vulnerable to depression. While people often use the word "depression" to describe a momentary mood, the same term is also used to label a more serious and long-lasting problem that can interfere with many aspects of a person's life. It's that second definition that is the focus of this book. Depression: A Teen's Guide to Survive and Thrive is a guidebook for teenagers who are depressed or at risk for depression, full of useful information, helpful self-reflection quizzes, and easy-to-do exercises. This guide discusses depression and provides guidance on cognitive—behavioral therapy principles to help teens take a problem-solving, strategy-based approach to deal with depressed moods, thoughts, and behavior. Intended to serve as an adjunct to therapy, this is a very practical and easy-to-read book that is not overwhelming for teens.

**Implementing the IBM System Storage SAN Volume Controller with IBM Spectrum Virtualize Version 8.4** Aug 06 2020 Continuing its commitment to developing and delivering industry-leading storage technologies, IBM® introduces the IBM FlashSystem® solution that is powered by IBM Spectrum® Virtualize V8.4. This innovative storage offering delivers essential storage efficiency technologies and exceptional ease of use and performance, all integrated into a compact, modular design that is offered at a competitive, midrange price. The solution incorporates some of the top IBM technologies that are typically found only in enterprise-class storage systems, which raises the standard for storage efficiency in midrange disk systems. This cutting-edge storage system extends the comprehensive storage portfolio from IBM and can help change the way organizations address the ongoing information explosion. This IBM Redbooks® publication introduces the features and functions of an IBM Spectrum Virtualize V8.4 system through several examples. This book is aimed at pre-sales and post-sales technical support and marketing and storage administrators. It helps you understand the architecture, how to implement it, and how to take advantage of its industry-leading functions and features.

**The Art of Client Service** Nov 08 2020 A practical guide for providing exceptional client service Most advertising and marketing people would claim great client service is an elusive, ephemeral pursuit, not easily characterized by a precise skill set or inventory of responsibilities; this book and its author argue otherwise, claiming there are definable, actionable methods to the role, and provide guidance designed to achieve more effective work. Written by one of the industry's most knowledgeable client services executives, the book begins with a definition, then follows a path from an initial new business win to beginning, building, losing, then regaining trust with clients. It is a powerful source of counsel for those new to the business, for industry veterans who want to refresh or validate what they know, and for anyone in the middle of the journey to get better at what they do.

Open Source Software: Mobile Open Source Technologies Jul 17 2021 This book constitutes the refereed proceedings of the 10th International IFIP WG 2.13 Conference on Open Source Systems, OSS 2014, held in San José, Costa Rica, in May 2014. The 16 revised full papers and 16 short papers presented together with 5 poster papers were carefully reviewed and selected from 61 submissions. They have been organized in the following topical sections: open source visualization and reporting; open source in business modeling; open source in mobile and web technologies; open source in education and research; development processes of open source products; testing and assurance of open source projects; and global impact on open source communities and development. The last section consists of five case studies and demonstrations of open source projects.

**Do More Faster** Jul 29 2022 Refreshed, updated, and expanded. Do More Faster provides time-tested advice, tips, and experiences by founders and mentors of Techstars to help entrepreneurs succeed! David Cohen and Brad Feld, leading advocates for entrepreneurs and startups, team up to provide first-time entrepreneurs with the tools, insights, and experiences to help them do more faster. The authors share their decades of experience working with thousands of startup founders and have enlisted the advice of dozens of Techstars startup founders and mentors. Contributors include Tim Ferriss, Eric Ries, Matt Mullenweg (WordPress), Isaac Saldana (SendGrid), and other successful entrepreneurs. Co-founders of Techstars, the worldwide network that helps entrepreneurs succeed, Cohen and Feld recognize the daunting task of creating a sustainable business and have seen first-hand the common mistakes first-time entrepreneurs make over and over. The authors take the complexity and uncertainty of starting a business and distill the critical factors into seven themes: Ideas and Vision, People, Working Effectively, Product, Fundraising, Legal and Structure, and Work and Life Harmony. They share their hard-won successes, failures, and advice for anyone with an idea who wants to create a business. Throughout the book crucial questions are raised and addressed from multiple perspectives. ? How important is it to have an original idea? ? How is founder conflict handled? ? What are the tradeoffs between bootstrapping and financing? Make-or-break decisions like company structure, hiring, and legal consequences are presented in an easy-to-understand style. Do More Faster will elevate your thinking on a range of important topics, help you avoid costly mistakes, and provide you with a resource to consult as you go from idea to successful business. If you have the drive and desire to start a business, need to create a vibrant entrepreneurial ecosystem in your community, or want to spark greater innovation in your organization—don't go it alone. Use the advice, tips, and tactics found throughout Do More Faster to give yourself the best chance of succeeding.

**Youngsters Solving Mathematical Problems with Technology** Apr 13 2021 This book contributes to both mathematical problem solving and the communication of mathematics by students, and the role of personal and home technologies in learning beyond school. It does this by reporting on major results and implications of the Problem@Web project that investigated youngsters' mathematical problem solving and, in particular, their use of digital technologies in tackling, and communicating the results of their problem solving, in environments beyond school. The book has two focuses: Mathematical problem solving skills and strategies, forms of representing and expressing mathematical thinking, technological-based solutions; and students' and teachers' perspectives on mathematics learning, especially school compared to beyond-school mathematics.

**A Strategic Guide to Technical Communication - Second Edition (Canadian)** Feb 21 2022 A Strategic Guide to Technical Communication incorporates useful and specific strategies for writers to create aesthetically appealing and usable technical documentation. These strategies have been developed and tested on a thousand students from a number of different disciplines over twelve years and three institutions. The second edition adds a chapter on business communication, reworks the discussion on technical style, and expands the information on visual communication and ethics into free-standing chapters. Particular attention is paid throughout to the needs of Canadian students.

**Regular Expressions Cookbook** Dec 10 2020 Take the guesswork out of using regular expressions. With more than 140 practical recipes, this cookbook provides everything you need to solve a wide range of real-world problems. Novices will learn basic skills and tools, and programmers and experienced users will find a wealth of detail. Each recipe provides samples you can use right away. This revised edition covers the regular expression flavors used by C#, Java, JavaScript, Perl, PHP, Python, Ruby, and VB.NET. You'll learn powerful new tricks, avoid flavor-specific gotchas, and save valuable time with this huge library of practical solutions. Learn regular expressions basics through a detailed tutorial Use code listings to implement regular expressions with your language of choice Understand how regular expressions differ from language to language Handle common user input with recipes for validation and formatting Find and manipulate words, special characters, and lines of text Detect integers, floating-point numbers, and other numerical formats Parse source code and process log files Use regular expressions in URLs, paths, and IP addresses Manipulate HTML, XML, and data exchange formats Discover little-known regular expression tricks and techniques

Security and Privacy in the Age of Ubiquitous Computing Jul 25 2019 Even in the age of ubiquitous computing, the importance of the Internet will not change and we still need to solve conventional security issues. In addition, we need to deal with new issues such as security in the P2P environment, privacy issues in the use of smart cards, and RFID systems. Security and Privacy in the Age of Ubiquitous Computing addresses these issues and more by exploring a wide scope of topics. The volume presents a selection of papers from the proceedings of the 20th IFIP International Information Security Conference held from May 30 to June 1, 2005 in Chiba, Japan. Topics covered include cryptography applications, authentication, privacy and anonymity, DRM and content security, computer forensics, Internet and web security, security in sensor networks, intrusion detection, commercial and industrial security, authorization and access control, information warfare and critical protection infrastructure. These papers represent the most current research in information security, including research funded in part by DARPA and the National Science Foundation.

Intelligent Information Processing and Web Mining Nov 20 2021 This edited book contains articles accepted for presentation during The Intelligent Information Processing and Web Mining Conference IIS:IIP WM;04 held in Zakopane, Poland, on May 17-20, 2004. Considerable attention is devoted to the newest developments in the area of Artificial Intelligence with special calls for contributions on Web mining. This book will be a valuable source for further research in the fields of data mining, intelligent information processing, machine learning, computational linguistics, or natural language processing for search engines.

**Do More Faster India** Aug 30 2022 Do you dream of taking your Indian startup to new heights? Turn that dream into a reality! David Cohen, cofounder and Managing Partner of Techstars, and Brad Feld, cofounder of Techstars and Managing Partner of Foundry Group, team up to focus on the rapidly expanding Indian marketplace, bringing their years of shared experience to entrepreneurs, investors, and community ecosystem developers. Do More Faster India educates readers on all the major areas of creating, developing, and supercharging a young startup with a focus on the nuances of the Indian market and how Techstars is fostering new business opportunities in India. Each chapter is written by a different mentor or founder involved with the Techstars program and provides a unique perspective on the seven themes at the core of the Techstars mission: Ideas and Vision People Working Effectively Product Fundraising Legal and Structure Work and Life Harmony With a renewed focus on one of the most influential emerging markets in the world, Do More Faster India includes chapters written by Indian entrepreneurs and dedicated to India-specific topics and culture, as well as how Techstars fits into and serves the increasingly powerful Indian audience.
